

Southwest Vermont Regional Technical School District	ATTENDANCE	Policy # 5030C [Required]
--	-------------------	-------------------------------------

It is the policy of the Southwest Vermont Regional Technical School District to encourage attendance for the full number of days during which school is held for all students enrolled in the courses and programs at the Southwest Vermont Career Development Center or any educational sites operated by the District.

The philosophy of school attendance reflects our belief that a student's daily participation in the classroom learning experience is an integral part of his/her education. We believe that attendance is directly related to success in school. Daily classroom participation, and the work habits reinforced in the classroom are important tools for developing a well-rounded individual. Therefore, regular daily attendance takes precedence over situations, such as vacations and personal appointments.

This attendance policy is designed to promote positive work habits and attitudes in our students. Because of the experiential nature of technical education, missed learning experiences and lab opportunities are usually difficult and sometimes impossible to make up.

The District is committed to keeping accurate records of attendance for all students..
