

Video Production

In the Video Productions program you will learn about composition, screenwriting and advertising. You will develop skills in editing, sound and video, lighting, directing & interview techniques. In this program you will learn about careers in the video/mass media field. You will create storyboards during the development of a story and you will practice script writing.

High School Credit (s): 3 credits earned in Video Production 1 (0.5 Technology, 2.5 Elective)
3 credits earned in Video Production 2 (Elective)

Grades: 10th – 12th

Numerically Graded

Year Long (each program)

Students should have instructor permission.

(Suggested) Introductory Class to the Video Production Program

Stagecraft: Stagecraft is a hands-on class where you will learn carpentry skills while building and painting sets for theatre productions. You will also have the opportunity to design sets for the theatre. You will learn how to create lighting for plays as well. This is a good class for people interested in building trades, theatre or video.

High School Credit(s): 0.5 credits earned towards elective credit.

Grades: 9th – 11th

Numerically Graded

One Semester Long
